E-ISSN: 2168-8648

FREQUENCY: quarterly

CONTENT AVAILABLE from Vol 1 Issue 1
(1991)

AUDIENCE: Institutional bond investors, portfolio managers, analysts, investment officers, plan sponsors, traders, academics, librarians, and principals.

ABOUT THE JOURNAL

The Journal of Fixed Income (JFI) provides sophisticated analytical research and case studies on bond instruments of all types – investment grade, high-yield, municipals, ABS and MBS, and structured products such as CDOs and credit derivatives. Industry experts offer detailed models and analyses of fixed income structuring, performance tracking, and risk management. The JFI helps readers to manage bond portfolios more efficiently, evaluate interest rate strategies and manage interest rate risk, gain insights on structured products, and to stay on the cutting edge of fixed income markets.

MISSION

To support work that lies at the intersection of academic ideas and the practice of fixed income portfolio management. The articles, authored by sell side and buy side investment professionals, the Federal Reserve System, the Bank for International Settlements, the International Monetary Fund, the government-sponsored agencies and rating agencies, provide insights to practitioners and help academics focus on timely and relevant applied research.
